How to use this workbook

1. *Assumptions* — every driver of the model (growth, margins, working capital, WACC, terminal growth). Blue = hardcoded input;
2. *Income Statement* — fully formula-linked to Assumptions; historicals tie to Zepto's actual reported revenue and net loss (FY23A-24E).
3. *Balance Sheet* — fully linked; the Balance Check row (bottom) reads exactly 0 in every year, FY23A through FY33E.
4. *Cash Flow* — indirect method; includes a funding-plug mechanism so cash never goes negative, mirroring Zepto's actual reliance on debt.
5. *DCF* — unlevered FCF, WACC-discounted, Gordon Growth terminal value, plus a WACC x terminal-growth sensitivity grid.
6. *Cell comments* throughout flag which figures are actual disclosed numbers vs. modeled analyst estimates — hover over any cell
